TRENDS IN NEUROSCIENCES

REFERENCE EDITION

Volume 14

1991

CONTENTS

JANUARY

Research News
Immortalized neurons derived from tumors in transgenic mice, *by Anne L. Calof* 1

Viewpoint
Migraine: a research field matured for the basic neurosciences, *by Jes Olesen and Lars Edvinsson* 3
Does anesthesia cause loss of consciousness? *by John Kulli and Christof Koch* 6

Perspectives
Neuroscience in Eastern Europe, *by Gavin J. Swanson* 11
Neuroscience in Czechoslovakia, *by J. Bureš, L. Cigánek and O. Vinař* 11

Letter to the Editor
The importance of the blood–brain barrier in fetuses and embryos, *by Norman R. Saunders, Katarzyna M. Dziegielewska and Kjeld Møllgård* 14
Reply, *by Werner Risau and Hartwig Wolburg* 15

Reviews
A role for $GABA_B$ receptors in excitation and inhibition of thalamocortical cells, *by Vincenzo Crunelli and Nathalie Leresche* 16
Dopaminergic innervation of the cerebral cortex: unexpected differences between rodents and primates, *by B. Berger, P. Gaspar and C. Verney* 21
Activity-dependent modulation of nerve terminal excitation in a mammalian peptidergic system, *by Charles W. Bourque* 28
Plasticity of auditory maps in the brain, *by Andrew J. King and David R. Moore* 31

Book Reviews
Computer Techniques in Neuroanatomy (by Joseph J. Capowski), *by James A. McKanna* 37
The Neural Basis of Echolocation by Bats (by G. D. Pollak and J. H. Casseday), *by Daniel Margoliash* 38
The Segmental Motor System (edited by Marc D. Binder and Lorne M. Mendell), *by Michael Brown* 39
Neuromethods 16: Molecular Neurobiological Techniques (edited by Alan A. Boulton, Glen B. Baker and Anthony T. Campagnoni), *by Allan J. Tobin* 39
Ion Channels (Vol. 2) (edited by Toshio Narahashi), *by Christopher Miller* 40
SYSTAT–SYGRAPH Version 5.0 for the Macintosh® (by SYSTAT, Inc.), *by Simon Carlile and Andrew J. King* 41

Book in Brief
Neurobiology of Reproduction in the Female Rat (by John W. Everett), *by Pamela MacKinnon* 42

Books Received 42

FEBRUARY

Research News
Interesting times for dopamine receptors, *by Philip G. Strange* 43

Viewpoint
Do calcium channel classifications account for neuronal calcium channel diversity? *by D. Swandulla, E. Carbone and H. D. Lux* 46

Perspectives
Neuroscience in Poland, *by M. Kossut* 52

Letter to the Editor
Parallel processing in the basal ganglia: up to a point, *by Gérard Percheron and Michel Filion* 55
Reply, *by Garrett Alexander and Michael Crutcher* 56
Reply, *by Lynn D. Selemon and Patricia S. Goldman-Rakic* 58

Reviews
Glutamate, nitric oxide and cell–cell signalling in the nervous system, *by John Garthwaite* 60
Plateau potentials and active integration in the 'final common pathway' for motor behaviour, *by Ole Kiehn* 68
Common patterns of plasticity contributing to nociceptive sensitization in mammals and *Aplysia*, *by Clifford J. Woolf and Edgar T. Walters* 74
Contributions of topography and parallel processing to odor coding in the vertebrate olfactory pathway, *by John S. Kauer* 79

MARCH

Viewpoint
The human stretch reflex and the motor cortex, *by Peter B. C. Matthews* 87

Perspectives
Neuroscience in Hungary, *by J. Hámori* 91

Letters to the Editor
Basal ganglia research and Tourette's syndrome, *by J. F. Leckman, A. M. Knorr, A. M. Rasmusson and D. J. Cohen* 94
'Silent' nociceptors in the skin, *by Bruce Lynn* 95
Reply, *by Stephen McMahon and Martin Koltzenburg* 95

Reviews
Direct regulation of ion channels by fatty acids, *by Richard W. Ordway, Joshua J. Singer and John V. Walsh, Jr* 96
Benzodiazepines, putative anxiolytics and animal models of anxiety, *by Simon Green* 101
Activity-dependent plasticity in the visual systems of frogs and fish, *by Hollis T. Cline* 104
Subjective contours – bridging the gap between psychophysics and physiology, *by Esther Peterhans and Rüdiger von der Heydt* 112

Book Reviews
Brain Circuits and Functions of the Mind: Essays in Honor of Roger W. Sperry (edited by Colwyn Trevarthen), *by Daniel Tranel* 120
The Visual System of Fish (edited by R. Douglas and M. Djamgoz), *by K. H. Ruddock* 120

Book in Brief
Right Hemisphere and Verbal Communication (by Yves Joanette, Pierre Goulet and Didier Hannequin), *by Chris Code* 121

APRIL

Research News
Horizontal and vertical pathways in neural induction, *by Sarah Guthrie* 123

Viewpoint
The possible role of adhesion in synaptic modification, *by David Schubert* 127

Perspectives
Neuroscience in the Republic of Georgia, *by Rusudan Burchuladze* 131

Perspectives on Disease
Neurological disease and mitochondrial genes, *by A. E. Harding* 132

Letters to the Editor
Hippocampal RSA in humans, *by F. H. Lopes da Silva* 138
Hippocampal RSA and DLSN neurons, *by J. P. Gallagher and M. J. Twery* 138
Reply, *by Mark Stewart and Steven E. Fox* 139

Reviews
The neurobiology of blindsight, *by Alan Cowey and Petra Stoerig* 140
Is interleukin 2 a neuromodulator in the brain? *by Giuseppe Nisticò and Giovambattista De Sarro* 146
The cyclic nucleotide-gated channels of vertebrate photoreceptors and olfactory epithelium, *by U. Benjamin Kaupp* 150

Book Reviews
An Introduction to Neural and Electronic Networks (edited by S. F. Zornetzer, J. L. Davis and C. Lau), *by Shawn Lockery* 157
Neuromethods Vol. 14: Neurophysiological Techniques (edited by A. A. Boulton, G. B. Baker and C. H. Vanderwolf), *by P. N. R. Usherwood* 158
Understanding the Brain through the Hippocampus. The Hippocampal Region as a Model for Studying Brain Structure and Function (Progress in Brain Research, Vol. 83) (edited by J. Storm-Mathisen, J. Zimmer and O. P. Ottersen), *by Taketoshi Ono* 159

Books in Brief
Alzheimer's Disease: the Concept of Disease and the Construction of Medical Knowledge (by Rob Dillmann), *by G. E. Berrios* 160
Neurobiology of *Mytilus edulis* (edited by George B. Stefano), *by J. L. S. Cobb* 160
G Proteins (edited by Ravi Iyenger and Lutz Birnbaumer), *by Annette Dolphin* 160
Immunologic Mechanisms in Neurologic and Psychiatric Disease (Research Publications: Association for Research in Nervous and Mental Disease, Vol. 68) (edited by Byron H. Waksman), *by Mitsuhiro Osame* 161

Books Received 161

MAY

Research News
Physiology of mutations affecting learning and memory in *Drosophila* – the missing link between gene product and behavior, *by Tim Tully* 163

Viewpoint
The changing scene of neurotrophic factors, *by Hans Thoenen* 165

Perspectives
Neuroscience in Yugoslavia, *by Ivica Kostović and Miloš Judaš* 171

Perspectives on Disease
The pathogenesis of demyelinating disease: insights from cell biology, *by Alastair Compston, Neil Scolding, Damien Wren and Mark Noble* 175

Letters to the Editor
Synaptic homeostasis and Parkinson's disease, *by Alexander Rudolf Cools* 182
Reply, *by Michael J. Zigmond* 183
The path forward in Hungarian neuroscience, *by M. Antal and others* 185
Reply, *by J. Hámori* 187

Reviews
Long-term survival of anucleate axons and its implications for nerve regeneration, *by George D. Bittner* 188
Molecular characterization of microtubule-associated proteins tau and MAP2, *by M. Goedert, R. A. Crowther and C. C. Garner* 193
Song-learning behavior: the interface with neuroethology, *by Peter Marler* 199
Reassessing the mechanisms and origins of vocal learning in birds, *by Fernando Nottebohm* 206

Book Reviews
Deducing Function from Structure (Vol. 2). Information Processing in the Retina (by Fritiof S. Sjöstrand), *by David Attwell* 211
Neurotransmitters in Embryogenesis (by G. A. Buznikov), *by Paul G. Layer* 212

Books in Brief
Neurobiology of Panic Disorder (Frontiers of Clinical Neuroscience, Vol. 8) (edited by James C. Ballenger), *by Tim Corn* 213
Brain Fluids and Metabolism (by Gary A. Rosenberg), *by James A. Nathanson* 213
Retrovirus Infections of the Nervous System. Current and Future Perspectives (Current Topics in Microbiology and Immunology, Vol. 160) (edited by M. B. A. Oldstone and H. Koprowski), *by Peter G. E. Kennedy* 214
The Auditory Cortex: Structural and Functional Bases of Auditory Perception (by Lindsay Aitkin), *by M. Abeles* 214

Books Received 215

JUNE

Research News
Mapping movements within a moving motor map, *by C. Asanuma* 217
Alzheimer plaques and tangles: advances on both fronts, *by Kenneth S. Kosik* 218

Viewpoint
Cholinergic mechanisms in learning, memory and dementia: a review of recent evidence, *by Hans C. Fibiger* 220
How do retinal axons find their targets in the developing brain? *by Mark Hankin and Raymond Lund* 224

Perspectives
A brief sketch of Soviet neuroscience, *by Konstantin Anokhin* 229

Perspectives on Disease
Hereditary cerebral hemorrhage with amyloidosis – Dutch type: its importance for Alzheimer research, *by Joost Haan, John A. Hardy and Raymond A. C. Roos* 231
The neurobiology of narcolepsy, *by Michael S. Aldrich* 235

Letter to the Editor
Not such a unifying hypothesis? *by Roger Lemon, Gabriella Ugolini and Stephen Edgley* 240
Reply, *by Philip R. Kennedy* 240

Reviews
Regulation of receptor expression by agonists: transcriptional and post-transcriptional controls, *by John R. Hadcock and Craig C. Malbon* 242
Stimulus classification by ensembles of climbing fiber receptive fields, *by Lee T. Robertson and Gin McCollum* 248
From behavior to molecules: an integrated approach to the study of neuropeptides, *by N. Tublitz, D. Brink, K. S. Broadie, P. K. Loi and A. W. Sylwester* 254

Book Reviews
Visual Evoked Potentials (Clinical Neurophysiology Updates, Vol. 3) (edited by J. E. Desmedt), *by Richard Srebro* 260
Glycine Neurotransmission (edited by O. P. Otterson and J. Storm-Mathisen), *by Alex M. Thomson* 261
Fig. P, Version 5.1 (software by Biosoft), *by P. A. Revest* 262
Envisioning Information (by Edward R. Tufte), *by Gavin J. Swanson* 263
Noradrenergic Neurons (by Marianne Fillenz), *by Torgny H. Svensson* 263
Central Regulation of Autonomic Functions (edited by Arthur D. Loewy and K. Michael Spyer), *by William T. Talman* 264

JULY

Research News
Capsaicin: gaps in our knowledge start to be filled, *by Anthony H. Dickenson* 265
Color and the integration of motion signals, *by Thomas D. Albright* 266
A noseful of odor receptors, *by Stuart Firestein* 270

Techniques
Concanavalin A: a tool to investigate neuronal plasticity, *by Stephen S. Lin and Irwin B. Levitan* 273

Perspectives
Neuroscience in the former GDR, *by Volker Bigl and Wolf Singer* 278

Viewpoint
Recognizing the visual stimulus from neuronal discharges, *by J. Krüger and J. D. Becker* 282
Opening the grey box, *by Rodney J. Douglas and Kevan A. C. Martin* 286

Reviews
cGMP: the wayward child of the cyclic nucleotide family, *by Michael F. Goy* 293
The dopamine hypothesis of the reinforcing properties of cocaine, *by M. J. Kuhar, M. C. Ritz and J. W. Boja* 299
Target attraction: are developing axons guided by chemotropism? *by Marc Tessier-Lavigne and Marysia Placzek* 303
The identity of the calcium-storing, inositol 1,4,5-trisphosphate-sensitive organelle in non-muscle cells: calciosome, endoplasmic reticulum . . . or both? *by Michel F. Rossier and James W. Putney, Jr* 310

Book Reviews
An Invitation to Cognitive Science (Vols 1–3). Vol. 1: Language (edited by Daniel N. Osherson and Howard Lasnik), Vol. 2: Visual Cognition and Action (edited by Daniel N. Osherson, Stephen M. Kosslyn and John Hollerbach), Vol. 3: Thinking (edited by Daniel N. Osherson and Edward E. Smith), *by Glyn W. Humphreys* 315
The Biology of Nicotine Dependence (Ciba Foundation Symposium 152) (edited by Greg Bock and Joan Marsh), *by E. F. Domino* 316
Analysis of Neuronal Microcircuits and Synaptic Interactions (Handbook of Chemical Neuroanatomy, Vol. 8) (edited by A. Björklund, T. Hökfelt, F. G. Wouterlood and A. N. van den Pol), *by John Parnavelas* 316
Steroids and Neuronal Activity (Ciba Foundation Symposium 153) (edited by Derek Chadwick and Kate Widdows), *by Karl E. Krueger* 317

Book in Brief
Mammalian Parenting: Biochemical, Neurobiological and Behavioural Determinants (edited by N. A. Krasnegor and R. S. Bridges), *by David H. Abbott* 318

Books Received 318

AUGUST

Special issue – Transplantation in the Nervous System

Introduction
Neural transplantation – an experimental tool with clinical possibilities, *by Anders Björklund* 319

Reviews
Transplantation of glial cells into the CNS, *by W. F. Blakemore and R. J. M. Franklin* 323
Genetically modified cells: applications for intracerebral grafting, *by Fred H. Gage, Michael D. Kawaja and Lisa J. Fisher* 328
The neuropathology of Alzheimer's disease investigated by transplantation of mouse Trisomy 16 hippocampal tissues, *by Sarah-Jane Richards* 334
Identifying and manipulating neuronal stem cells, *by Elena Cattaneo and Ron McKay* 338
The immune response to intracerebral neural grafts, *by D. J. Sloan, M. J. Wood and H. M. Charlton* 341
Transplantation to the diseased and damaged retina, *by Harold J. Sheedlo, Vinod Gaur, Linxi Li, Anthony D. Seaton and James E. Turner* 347
The reconstruction of cerebellar circuits, *by Constantino Sotelo and Rosa Magda Alvarado-Mallart* 350
Transplants of embryonic motoneurones to adult spinal cord: survival and innervation abilities, *by Gavin Clowry, Katarzyna Sieradzan and Gerta Vrbová* 355
The impact of intracerebral retinal transplants on types of behavior exhibited by host rats, *by Raymond D. Lund, Jeffrey D. Radel and Peter J. Coffey* 358
Transplantation: a new tool in the analysis of the mammalian hypothalamic circadian pacemaker, *by Martin R. Ralph and Michael N. Lehman* 362
Can fetal neural transplants restore function in monkeys with lesion-induced behavioural deficits? *by R. M. Ridley and H. F. Baker* 366
Cholinergic grafts, memory and ageing, *by Stephen Dunnett* 371
Prospects of transplantation in human neurodegenerative diseases, *by Olle Lindvall* 376
Ethical issues in brain-cell transplantation, *by Barry J. Hoffer and Lars Olson* 384

SEPTEMBER

Research News
Scrapie and GSS – the importance of protein, *by Nora Hunter* 389

Perspectives
How chicks make memories: the cellular cascade from c-*fos* to dendritic remodelling, *by Steven P. R. Rose* 390
Correlated activity in the CNS: a role on every timescale, *by Jeremy E. Cook* 397

Techniques
Magnetic brain stimulation: a tool to explore the action of the motor cortex on single human spinal motoneurones, *by K. R. Mills* 401

Letter to the Editor
Fatty acid elevation and brain seizure activity, *by Bryan T. Woods and Tak-Ming Chiu* 405

Reviews
Reflex control of magnocellular vasopressin and oxytocin secretion, *by Emmett T. Cunningham, Jr and Paul E. Sawchenko* 406
Pancreatic B cells are bursting, but how? *by Daniel L. Cook, Leslie S. Satin and William F. Hopkins* 411
Is the histaminergic neuron system a regulatory center for whole-brain activity? *by Hiroshi Wada, Naoyuki Inagaki, Atsushi Yamatodani and Takehiko Watanabe* 415

Book Reviews
Connectionist Modelling and Brain Function: The Developing Interface (edited by S. J. Hanson and C. R. Olson), *by Hanspeter A. Mallot* 418
The Organization of Learning (by Charles R. Gallistel), *by Françoise Schenk* 419
The Correlative Brain. Theory and Experiment in Neural Interaction (by Jos J. Eggermont), *by Jeremiah I. Nelson* 420

OCTOBER

Research News
Prion dimers: a deadly duo? *by John Hardy* 423
Inductive events in the neural tube, *by Joel C. Glover* 424

Techniques
Molecular analysis of neuronal physiology by gene transfer into neurons with herpes simplex virus vectors, *by Alfred I. Geller, Matthew J. During and Rachael L. Neve* 428

Perspectives on Disease
The cognitive basis of a biological disorder: autism, *by Uta Frith, John Morton and Alan M. Leslie* 433

Perspectives
Quantal analysis and synaptic efficacy in the CNS, *by Henri Korn and Donald S. Faber* 439

Reviews
Neural models of stereoscopic vision, *by Randolph Blake and Hugh R. Wilson* 445
Autoimmunity to glutamic acid decarboxylase (GAD) in Stiff-Man syndrome and insulin-dependent diabetes mellitus, *by Michele Solimena and Pietro De Camilli* 452
Glycine receptors: heterogeneous and widespread in the mammalian brain, *by Heinrich Betz* 458
Non-synaptic mechanisms of Ca^{2+}-mediated injury in CNS white matter, *by Stephen G. Waxman, Bruce R. Ransom and Peter K. Stys* 461
Sexual differentiation of monoaminergic neurons – genetic or epigenetic? *by Ingrid Reisert and Christoph Pilgrim* 468

Book Reviews
Electro-communication in Teleost Fish: Behavior and Experiments (by Bernd Kramer), *by Harold H. Zakon* 473
Principles of Brain Stimulation (by John S. Yeomans), *by Moshe Godschalk* 474
Cell Culture (Methods in Neurosciences, Vol. 2) (edited by P. Michael Conn), *by Rae Nishi* 474

Books in Brief
Essentials of Neural Development (by M. C. Brown, W. G. Hopkins and R. J. Keynes), *by Cynthia Lance-Jones* 475
The Vertebrate Olfactory System: Chemical Neuroanatomy, Function and Development (by Norbert Halasz), *by Alan Mackay-Sim* 476

Books Received 476

NOVEMBER

Research News
The revenge of the kainate receptor, *by Richard J. Miller* 477

Perspectives on disease
Paradoxical movement in Parkinson's disease, *by Mitchell Glickstein and John Stein* 480

Letters to the Editor

Cholinergic controversies: *letters by*
R. M. Ridley, H. F. Baker and Alan Fine 482
Elaine K. Perry, Dorothy Irving and Robert H. Perry 483
Martin Sarter, John P. Bruno and Paul Dudchenko 484
Reply, *by Hans C. Fibiger* 485

Reviews

The molecular genetics of invertebrate phototransduction, *by Rama Ranganathan, William A. Harris and Charles S. Zuker* 486
The basal forebrain–cortical cholinergic system: interpreting the functional consequences of excitotoxic lesions, *by Stephen B. Dunnett, Barry J. Everitt and Trevor W. Robbins* 494
Neurofilament phosphorylation: a new look at regulation and function, *by Ralph A. Nixon and Ram K. Sihag* 501

Book Review

Cockroaches as Models for Neurobiology (Applications in Biomedical Research, Vols 1 and 2) (edited by I. Huber, E. P. Masler and B. R. Rao), *by P. N. R. Usherwood* 507

DECEMBER

Research News

Molecules, maps and gradients in the retinotectal projection, *by R. Victoria Stirling* 509
Transgenic modelling of neurodegenerative events gathers momentum, *by M. V. Sofroniew and K. Staley* 513

Viewpoint

GABA: an excitatory transmitter in early postnatal life, *by Enrico Cherubini, Jean L. Gaiarsa and Yehezkel Ben-Ari* 515

Reviews

Olfaction in *Drosophila*: genetic and molecular analysis, *by John Carlson* 520
Two distinct receptor subtypes for mammalian bombesin-like peptides, *by James Battey and Etsuko Wada* 524
Polysialic acid on the surface of axons regulates patterns of normal and activity-dependent innervation, *by Urs Rutishauser and Lynn Landmesser* 528

Book Reviews

Brain Cholinergic Systems (edited by M. Steriade and D. Biesold), *by David Brown* 533
Neuropeptides in the CNS (Handbook of Chemical Neuroanatomy, Vol. 9) (edited by A. Björklund, T. Hökfelt and M. J. Kuhar), *by Julia M. Polak* 533
Potassium Channels: Structure, Classification, Function and Therapeutic Potential (edited by Nigel S. Cook), *by Leonard K. Kaczmarek* 534
Mind, Brain and Adaptation in the Nineteenth Century (History of Neuroscience, No. 3) (by R. M. Young), *by Tilli Tansey* 535
Chaos in Brain Function (edited by Erol Basar), *by G. B. Ermentrout* 536
Markers for Neural and Endocrine Cells: Molecular and Cell Biology, Diagnostic Applications (edited by M. Gratzl and K. Langley), *by Julia M. Polak* 536

Books in Brief

The Forebrain in Nonmammals (edited by Walter K. Schwerdtfeger), *by R. Glenn Northcutt* 537
Brain Size and the Evolution of Mind (by Harry Jerison), *by Giorgio M. Innocenti* 537

Author Index 539

Subject Index 543

ERRATA

Corticospinal, rubrospinal and rubro-olivary projections: a unifying hypothesis, *by Philip R. Kennedy* (December 1990, pp. 474–479) 13
Dopaminergic innervation of the cerebral cortex: unexpected differences between rodents and primates, *by B. Berger, P. Gaspar and C. Verney* (January, pp. 21–27) 119
Is interleukin 2 a neuromodulator in the brain? *by Giuseppe Nisticò and Giovambattista De Sarro* (April, pp. 146–150) 405

ADDENDUM

Neuroscience in Hungary, *by J. Hámori* (March, pp. 91–93) 132
